

SALIM TURDALIEV

Applied Econometrician | Data Scientist | Economist | Policy Analytics Consultant | PhD Economics

Email: salimturdaliev@gmail.com

Residency: Prague, Czech Republic | Citizenship: Uzbekistan

PROFESSIONAL PROFILE

Data scientist and applied econometrician with a PhD in Economics and experience delivering quantitative research, data analysis and EU-oriented analytical work for public-sector clients. Strong background in end-to-end data workflows including data cleaning, dataset construction, variable engineering, exploratory data analysis, market and longitudinal microdata analysis; writing reproducible analytical code in R, Python and Stata; constructing indicators and estimating statistical and econometric models. Experienced in transforming complex quantitative findings into clear written outputs, including peer-reviewed journal articles, technical reports, policy reports and client-facing analytical deliverables. Methodological expertise includes RCTs, quasi-experimental evaluation, panel-data methods, heterogeneous treatment effects, Markov cohort modelling, cost-effectiveness analysis and sensitivity analysis. Held university teaching roles in econometrics, statistics, applied micro-econometrics and data analysis at undergraduate and graduate levels across leading universities in Europe and Asia. Sector experience includes energy and climate policy, regulatory economics, postal and delivery markets, labour and working-time policy, cross-border movement and transport, and health economics.

CORE EXPERTISE

Data science and programming	Data cleaning, merging, reshaping and validation; feature/indicator construction; exploratory data analysis; reproducible workflows in R, Python, Stata and Excel; analytical tables and visualisations.
Statistical and econometric modelling	Regression modelling; fixed-effects panel models; difference-in-differences; matching; RCT analysis; heterogeneous treatment effects; model diagnostics; robustness and sensitivity checks.
Data types and policy analytics	Survey data; household panel data; administrative and official statistics; market and sector indicators; consultation and stakeholder datasets; policy, regulatory and socio-economic data.
Analytical writing and communication	End-to-end drafting of analytical reports; peer-reviewed academic writing; technical documentation; interpretation of model outputs; data storytelling; executive summaries; policy and client-facing presentation of quantitative findings.
Sector knowledge	Energy and climate policy; behavioural interventions; postal and delivery services; labour standards and working time; health economics; circular economy and regulatory evidence notes.

PROFESSIONAL EXPERIENCE

Economist (Data and Policy Analytics) | RPA Prague, Prague | 12.2023-09.2026

- Contribute to EU-focused policy studies, evaluations and analytical workstreams for public-sector clients, including European Commission and EU-agency assignments.
- Used R, Python, Stata and Excel across the full analytical workflow, including data cleaning, variable construction, exploratory analysis, statistical and econometric modelling, model diagnostics, robustness checks, visualisation, and preparation of client-facing analytical outputs.
- Built analysis-ready datasets from survey responses, official statistics, market indicators, consultation materials and project sources; cleaned, coded, classified, merged and validated variables for policy and modelling work.
- Conducted statistical and modelling work, including Markov cohort models, transition-probability structures, cost and utility inputs, QALY/DALY calculations, discounting and probabilistic sensitivity analysis.
- Identified trends, patterns and anomalies in sectoral and socio-economic data and translated quantitative findings into clear, decision-oriented insights for policy and consulting deliverables.
- Drafted and edited technical report sections, analytical narratives, executive-style summaries and policy-relevant conclusions, converting complex data and modelling results into clear written deliverables for non-technical stakeholders.
- Developed and refined survey and questionnaire materials for policy studies, including closed-ended questions, Likert-scale batteries, sector-specific modules and materials for stakeholder consultation.

Research Fellow | Prague University of Economics and Business | 11.2025-present

- Construct and analyse longitudinal household-level datasets on energy demand, combining billing data, baseline surveys, treatment assignment, follow-up information and contextual variables.

- Write reproducible code for data cleaning, variable construction, fixed-effects models, RCT/treatment-effect estimation, heterogeneity analysis, robustness checks and publication-ready tables and figures.
- Apply econometric and statistical methods to evaluate behavioural interventions, energy-pricing reforms and household responses using panel data, field-experiment data and natural-experiment settings.
- Author and co-author peer-reviewed journal articles based on original data analysis, including full-cycle work from research design and dataset preparation to estimation, interpretation, manuscript writing and revision.
- Communicate complex econometric findings through academic papers, policy-relevant summaries, tables, figures and presentations for both technical and non-technical audiences.
- Write reproducible code for data cleaning, variable construction, fixed-effects models, RCT/treatment-effect estimation and heterogeneity analysis.

Lecturer | CIEE, Charles University, Prague | 09.2023-06.2025

- Taught undergraduate courses on the Economics of the European Union and comparative European economic systems, with responsibility for assessment design, grading and student supervision.
- Designed, updated and audited course syllabi, weekly topics, learning materials, readings, assignments and assessment rubrics on EU institutions, economic integration, energy policy, monetary and fiscal policy, and comparative economic systems.

Earlier academic and analytical roles | WIUT, MDIS Tashkent, CERGE-EI / Charles University and De Facto Marketing | 2010-2020

- Held teaching, research, and data-analysis roles covering econometrics, statistics, microeconomics, mathematics, labour economics, statistical estimation and applied data work.

SELECTED CONSULTING, DATA AND POLICY PROJECTS

Prospective Study on the Future of the Postal Sector | *European Commission DG GROW / RPA Prague*

Co-authored and supported data collection, data analysis, econometric modelling, and report drafting for an EU-level study on postal-sector developments, market trends and regulatory questions, translating sector evidence and market indicators into structured analytical findings.

Schengen and cross-border movement analysis | *DG HOME study support / RPA Prague*

Supported analysis of cross-border movement and transport, with a focus on Romania and Bulgaria. Structured policy-relevant evidence, compared country-level information and prepared analytical inputs for the team.

Reduced working time in Europe | *Eurofound tender and case-study support / RPA Prague*

Contributed to questionnaire development, case-study design and survey logic for research on reduced working time in Europe, including employee and manager perspectives, closed-ended survey design, variable definitions and policy-relevant evidence framing.

Cancer Prevention at Work and health-economic modelling | *RPA Prague*

Conducted costing and health-economic modelling work related to cancer prevention, including Markov model structures, health-state transitions, transition probabilities, costs, utilities, QALYs/DALYs, discounting and probabilistic sensitivity analysis.

Postal and delivery labour standards analysis | *European Commission DG GROW / RPA Prague*

Analysed labour standards and delivery operations in the postal and parcel sector, synthesising institutional and stakeholder evidence on employment models, working conditions and regulatory implications.

Regulatory and sectoral data analysis | *European Commission DG GROW / RPA Prague*

Prepared sectoral and regulatory analyses that translated technical documentation, official databases, consultation materials and policy reports into structured findings, indicators and client-facing analytical outputs.

SELECTED DATA SCIENCE AND APPLIED RESEARCH PROJECTS

Long-term behavioural intervention in energy conservation | *Field experiment in Armenia*

Lead author and principal empirical analyst for a randomized field experiment on household electricity conservation. Led the full data and econometric workflow, including construction of monthly household panel datasets from raw billing and survey data, data cleaning, variable engineering, treatment coding, fixed-effects and treatment-effect estimation, heterogeneity and robustness analysis, publication-ready tables and visualisations, interpretation of results and full analytical writing for policy briefs and peer-reviewed publication.

Electricity nudges and spillover effects on gas demand | *Work in progress*

Lead author and principal empirical analyst for a research paper on whether electricity-focused behavioural interventions spill over to residential gas consumption and appliance purchases. Led the full empirical and writing workflow, including research design, construction of multi-wave electricity, gas and appliance-purchase datasets, data cleaning and merging, outcome-variable

construction, treatment-control comparisons, econometric estimation, heterogeneity analysis, interpretation of results, and full manuscript writing for policy and academic audiences.

Energy-pricing reforms and household behaviour | *Natural experiments in transition economies*

Solo/Lead author and principal empirical analyst on a series of papers examining household responses to energy-pricing reforms. Led the end-to-end research workflow, including empirical strategy design, cleaning and construction of household microdata, tariff-exposure coding, behavioural outcome-variable construction, quasi-experimental estimation, fixed-effects modelling, heterogeneity and robustness analysis, interpretation of findings, and full analytical writing for peer-reviewed journal publications.

EDUCATION

PhD Economics | Institute of Economic Studies, Charles University, Prague | 2025

MA Economics | CERGE-EI, Charles University, Prague | 2017

BSc Economics with Finance, First Class Honours | Westminster International University in Tashkent | 2014

TECHNICAL SKILLS

Programming and tools: R, Python, Stata, Microsoft Excel; reproducible analytical scripts; data cleaning, merging and reshaping; variable/feature construction; exploratory data analysis; charts, regression tables and technical annex outputs.

Methods: statistical modelling; RCTs; difference-in-differences; matching; fixed-effects and panel-data models; heterogeneous treatment effects; survey-data analysis; model diagnostics; robustness and sensitivity checks; Markov cohort modelling; cost-effectiveness and QALY/DALY modelling.

Data and outputs: survey datasets, household panel data, official statistics, market/sector indicators, treatment-control datasets, descriptive tables, visualisations and client-ready analytical summaries.

SELECTED GRANTS AND RECOGNITION

- Principal Investigator, Scientific grant GA UK 454120: The Effect of Non-linear Tariff on Energy Demand and Investment in Electric Durables in Transition Economies. Recognized as the best GA UK project at the Faculty of Social Sciences, Charles University, in 2023.
- Co-investigator, Scientific grant GA UK 327421: Residential Energy Demand, Adoption of Energy Efficient Technologies, and Electricity Disruptions in Transition Economies.
- Selected by Times Higher Education to participate in the World University Rankings Global Academic Reputation Survey.
- Multiple publication and academic-activity scholarships from IES FSV, Charles University.
